PROFILE

I help organizations strengthen their security posture by identifying risks, improving cloud and endpoint security, and implementing practical security solutions that support business goals. My experience spans Microsoft 365, Azure, AWS, and information security, where I have supported organizations across healthcare, legal, accounting, and professional services. Working in a Managed Service Provider (MSP) environment taught me that effective cybersecurity is as much about understanding risk, communicating clearly, and collaborating with people as it is about technology. I contributed to a 35% reduction in high-risk vulnerabilities through structured vulnerability management and continue to grow through hands-on cloud security projects, mentoring, and continuous learning.

CORE EXPERTISE

- Information Security • Cloud Security • Vulnerability Management • Incident Response • Security Operations
- Microsoft 365 Security • Azure & AWS Security • Identity & Access Management • Endpoint Security
- Risk Assessment • Security Compliance • Technical Documentation • Client Communication

PROFESSIONAL EXPERIENCE

Security Analyst / IT Support Technician | DataNetX (MSP)

Midland, Ontario | Jun 2024 – Dec 2024

Reduced Organizational Risk

Supported organizations across healthcare, legal, accounting, and professional services by conducting recurring vulnerability assessments across more than 200 endpoints. Worked with clients to prioritize remediation based on business impact, contributing to a 35% reduction in high-risk vulnerabilities and a stronger overall security posture.

Improved Security Operations

Investigated security alerts, validated suspicious activity, and coordinated remediation using SIEM and endpoint security platforms. Balanced multiple client environments while maintaining an average incident response time of under two hours.

Strengthened Identity & Endpoint Security

Implemented and supported Microsoft 365 security controls, including Multi-Factor Authentication, Conditional Access, endpoint protection, and patch management to improve identity security and reduce unauthorized access risks.

Enhanced Security Awareness

Assisted with phishing investigations and user awareness initiatives, helping clients build resilience against social engineering attacks through practical education and timely response.

SELECTED SECURITY IMPLEMENTATIONS

- **FinTrust Cloud Infrastructure Security:** Secured and monitored a cloud-hosted financial application environment through Linux hardening, role-based access control, least privilege, secure connectivity, Wazuh monitoring, and security validation.
- **Wazuh Detection Engineering:** Developed and validated custom Wazuh detection rules for SQL injection, cron-based persistence, and sudo privilege escalation, mapping detections to MITRE ATT&CK and verifying alert generation through controlled log testing.
- **Microsoft Sentinel Cloud Security Monitoring:** Integrated Azure Activity Logs and Microsoft Defender for Cloud into Microsoft Sentinel, validated security telemetry using KQL, and supported cloud monitoring aligned with ISO 27001 and SOC 2 principles.
- **AWS Cloud Security:** Applied IAM, MFA, CloudTrail, CloudWatch, S3 security controls, and least-privilege access to strengthen identity security, monitoring, and governance across AWS resources.

COMMUNITY LEADERSHIP

Community Volunteer & Cybersecurity Mentor | NxtCyberForge

2026 – Present

Contribute to a cybersecurity community dedicated to helping aspiring professionals discover career paths and build practical skills. Collaborate with volunteers to organize beginner-focused learning sessions, mentor newcomers, develop educational resources, and deliver community presentations, including 'Mastering the Cloud: Cloud Security Best Practices.'

EDUCATION

Cybersecurity Co-op Graduate Certificate (GPA: 92.58)

Georgian College, Barrie, Ontario | 2024

BSc Mathematics & Computer Science (First Class Honours)

University of Agriculture, Makurdi | 2017

PROFESSIONAL CERTIFICATIONS

CompTIA Security+

Microsoft Azure Fundamentals (AZ-900)

AWS Certified Cloud Practitioner

ISO/IEC 27001:2022 Lead Auditor

Google Cybersecurity Certificate

TECHNICAL PROFICIENCIES

Microsoft Sentinel • Microsoft Defender • Microsoft Entra ID • Azure • AWS • RocketCyber • Datto EDR • VulScan
• ND Pro • Wireshark • PowerShell • KQL • Windows Server • Linux • Active Directory

PROFESSIONAL PHILOSOPHY

I believe cybersecurity is most effective when it helps people and organizations operate with confidence. My approach combines continuous learning, thoughtful problem-solving, and practical security solutions that reduce risk while supporting business goals.
